Backend: Node.js, Express.js, REST APIs, JWT Authentication

Database: MongoDB, Mongoose

Tools: Git, GitHub, Postman, VS Code, Vercel, Render, Notion, Linear, Jira, Jibble

Also exploring: TypeScript, Next.js, Docker

EXPERIENCE

Full Stack Developer — Company Name Pvt. Ltd.

2025 – Present | 1 yr, Full-time

- Optimized key REST API endpoints (query indexing + response payload trimming), cutting average response time by ~40%.
- Designed and shipped a customer-facing feature end-to-end (React + Node/Express + MongoDB), adopted by the majority of active users within the first month.
- Implemented JWT-based authentication and role-based access control, replacing a legacy session system and reducing auth-related support tickets.

MERN Stack Intern — Company Name

2024 – 2025 | 1 yr, Internship

- Built and shipped CRUD modules end-to-end using React, Express and MongoDB under senior developer guidance.
- Learned to write and consume REST APIs, handle async data flows, and structure a full-stack app for maintainability.
- Contributed bug fixes and small features to a production codebase, working with Git workflows and code review.
