Hiral Vavadiya

Full Stack Developer

Surat, Gujarat, India | +91 9106833379 | thisishiralvavadiya@gmail.com
github.com/hiralvavadiya | linkedin.com/in/hiral-vavadiya

SUMMARY

Full Stack Developer with 2+ years of hands-on experience building web applications — a year developing frontends at Serialcom Infotech, then over a year owning features end-to-end at Theta Solutions. Experienced with real-time systems over WebSockets, REST APIs on Node.js and Express, and React/Next.js interfaces. Comfortable taking a requirement from schema to shipped UI.

TECHNICAL SKILLS

Frontend: React.js, Next.js, Redux, JavaScript (ES6+), TypeScript, Tailwind CSS, Material-UI, Bootstrap, HTML5, CSS3
Backend: Node.js, Express.js, REST APIs, WebSockets, Socket.io
Databases: MongoDB, Mongoose, MySQL
Tools: Git, GitHub, VS Code, Postman, Notion, Linear, Jira, Jibble

EXPERIENCE

Full Stack Developer — Theta Solutions

Jun 2025 – Jul 2026 | Surat, Gujarat | Full-time, On-site

- Owned features end-to-end across the stack — REST APIs on Node.js and Express backed by MongoDB, through to the React interfaces built on top of them.
- Worked on custom software delivered to external clients, translating requirements into working features rather than picking up pre-specified tickets.
- Collaborated in a small team using Git workflows, code review, and Linear/Jira for tracking.

Frontend Developer (Internship) — Serialcom Infotech

May 2024 – Apr 2025 | Surat, Gujarat | Internship, On-site

- **SmartScorer.com** — live cricket scoring platform. Built real-time scoring and match management over WebSockets, with responsive UIs for live scoring, auctions, profiles and admin match control. Implemented role-based login and dynamic content updates. *Next.js, React, Tailwind CSS, MUI, Node.js.*
- **IDO PDF** — PDF editor and converter supporting images (JPG/PNG/TIFF), text and Word documents to PDF and back. Focused on cross-browser compatibility and performance. *Next.js, React, Tailwind CSS.*

PROJECTS

Outfit Rental System — Enterprise-style rental management system — inventory, bookings, payments and availability with cleaning-buffer conflict detection and transaction-level locking to prevent double-booking. *NestJS, TypeORM, PostgreSQL, React 19, TanStack, Nx, Docker.* (Private repo)

Student Application Portal — Full-stack admissions portal with form submission, document upload, and a dashboard updating in real time. *React, Tailwind CSS, Node.js, Express, MongoDB.* github.com/hiralvavadiya/student-application-portal

Device Tracker — Live Location — Real-time device tracking with live location updates and dynamic map markers pushed over Socket.io. *Node.js, Express, Socket.io.* github.com/hiralvavadiya/device-tracker

3D Solar System — Interactive 3D solar system built for the NASA Space Apps Challenge — **Best Use of Science award winner**. *TypeScript, Spline, 3D models.*

Significo Clone — Healthcare Website — Healthcare marketing site with GSAP animations and Locomotive Scroll for smooth-scroll interaction. *HTML, Tailwind CSS, JavaScript, GSAP.* github.com/hiralvavadiya/significo-clone

EDUCATION & CERTIFICATIONS

Bachelor of Science (Computer Science) — Shree Ram Krishna Institute of Computer Education and Applied Science, Surat | Jul 2022 – Jul 2025 | SGPA 8.40

Full-Stack Developer (MERN) — Creative Digital Multimedia Institute | Mar 2023 – Mar 2024
